PROFESSIONAL SUMMARY

Programming instructor and software developer who has taught students online through his own platform, zxschool, and in one to one sessions with more than 20 learners. Has also run two university workshops and organized and judged a competitive programming hackathon. Backed by hands on engineering work in React, Firebase, JavaScript and Flutter, including live client websites and a professional internship, and a 1st place finish at CosmoCon'25 Web Hackathon. Seeking an Instructor position at Saylani to teach programming courses and help students build job ready skills.

TEACHING AND MENTORING EXPERIENCE

Founder and Instructor, zxschool (Online Learning Platform)

- Built and run zxschool, my own online platform for teaching programming to students remotely.
- Delivered online instruction to students through the platform, covering concepts, practice and guided project work.

One to One Programming Tutor

- Provided personalized one to one classes to more than 20 students, adapting pace and explanations to each learner's level.
- Helped students move from basics to building working programs and small projects.

Workshop Instructor, NUML Lahore

- Conducted 2 hands on workshops for university students as part of ACM chapter activities.
- Planned the content, led live coding sessions and supported participants during exercises.

Organizer and Judge, Competitive Programming Hackathon (HackForge)

- Organized the competitive programming track, which brought together 20+ teams.
- Judged participants on problem solving, correctness and code quality, and gave feedback to teams.

Tech Head, ACM NUML Student Chapter (2025 to Present)

- Lead technical initiatives, run coding sessions and mentor peers in software development and problem solving.

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, Dart
Frontend: React.js, Next.js
Backend and APIs: Node.js, Express.js (basic), Firebase (Auth, Firestore, Hosting)
Mobile: Flutter (Dart)
Databases: SQL Server, Firebase Firestore, Supabase
Tools: Git, GitHub, VS Code, Cursor AI, npm, Vite
Teaching Skills: Curriculum and lesson planning, live coding, one to one mentoring, workshop delivery, code review and feedback, student assessment

PROFESSIONAL EXPERIENCE

Flutter Developer Intern, ACME Digital Solutions, Pakistan (Feb 2025 to Mar 2025)

- Completed a structured Flutter internship building cross platform mobile UIs using Dart.
- Integrated Firebase Auth and Firestore for real time data and user authentication flows.
- Worked in a professional workflow with PR based code review and deployment pipelines.

PROJECTS

Zohaib-Inmotion, Client Portfolio Website (React, Firebase) zohaib-inmotion.web.app

- Designed and built a portfolio website for a media and video editing client, from requirements to deployment; the site is live and in active use.

Tavryz, Software Engineering and Design Studio (React, Firebase) tavryz.com

- Developer at a studio delivering web, mobile and AI driven client projects; build and maintain client sites from architecture through deployment.

ICCS Globalized, Client Website (React, Firebase) iccsglobalized.com

- Delivered a live production website for a real client with responsive React components and Firebase integration.

OPEN SOURCE CONTRIBUTIONS

XLICON V2 MD github.com/ahmmikun/XLICON-V2-MD

- Contributed a pull request that was reviewed and merged into this open source WhatsApp bot repository.

EDUCATION

Bachelor of Science in Computer Science, NUML Lahore (Feb 2024 to Present)
National University of Modern Languages, Semester 6

Intermediate (ICS, Computer Science), APS College, Mangla Cantt (Completed)

ACHIEVEMENTS

- **1st Place, CosmoCon'25 Web Hackathon, PUCIT** (Dec 2025): led team "Full Stack Four Eyes" to victory; the win led directly to a first client.
- **3rd Place, Surge UMT Hackathon 2025:** podium finish showing rapid prototyping and full stack delivery under time limits.
